

PERFECT BALANCE FLEXIBILITY, SIMPLICITY AND PRODUCTIVITY.

The A 3000 Series equipment is characterised by high productivity, thanks to a simple, strong and efficient design. Flexibility to adapt to different levels of demand.

SIMPLICITY The design achieves a simple sprayer, which avoids complications in the field, and makes the work much more productive. Without being a specialist, you can understand how the sprayer works all the way from your loading system, spraying system to the entire hydraulic circuit, making it simple and easy to use.

STRENGTH the chassis was designed to withstand the highest demands, thanks to its reinforced steel structure. The boom is manufactured in large steel tubes, and tested in the most demanding markets in the world.

EFFICIENCY Customisable spraying systems to unlock your farms efficiency. With the option of tractor operated spraying with section control blanket line or spot spraying with the worlds leading Weedit Quadro technology. And to uplevel the efficiency even further it is now available as a robot ready sprayer.

CAIMAN A 3000 TRAILER SPRAYER

Compact, light weight
and productive.
